TIME

PHENOMENA

not a container,

does not flow;

not objects,

*but a stabilized
configuration*

*irreversible difference
persists*

*but outcrops of
ongoing generation*

Phenomenology — *describes phenomena within strata*

Structuralism — *extracts spatial configurations*

Derrida — *temporalizes structure (trace / différance)*

None explicitly formulates the recursive coupling between deep layer and strata.

What appears as layers is not fixed.

It is the ongoing recursion of a deeper asymmetry.
